## Welcome To Rendercy!

RenderCV Z is a LaTeX CV/resume framework. It allows you to create a high-quality CV as a PDF from a YAML file with full Markdown syntax support and complete control over the LaTeX code.

A substantial part of the content is taken from here  $\mathbf{Z}$ , where a *clean and tidy CV* pattern is proposed by **Gayle L. McDowell**.

## Quick Guide

- $\circ~$  Each section title is arbitrary, and each section contains a list of entries.
- There are seven different entry types: BulletEntry, TextEntry, EducationEntry, ExperienceEntry, NormalEntry, PublicationEntry, and OneLineEntry.
- Select a section title, pick an entry type, and start writing your section!
- $\circ\,$  Here  ${\bf \ensuremath{{\it L}}}$  , you can find a comprehensive user guide.

## Education

### University of Pennsylvania

BS in Computer Science

• GPA: 3.9/4.0 (Transcript  $\mathbf{Z}$ )

• **Coursework:** Software Foundations, Computer Architecture, Algorithms, Artificial Intelligence, Comparison of Learning Algorithms, Computational Theory.

## Experience

| Software Engineer, Intern                                                                                                                                                                | CA, USA                 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| Apple Computer                                                                                                                                                                           | June 2004 to Aug. 2004  |
| $\circ~$ Reduced time to render the user's buddy list by 75% by implementing a prediction algorithm.                                                                                     |                         |
| • Implemented iChat integration with OS X Spotlight Search by creating a tool that extracts metadata from saved chat transcripts and provides metadata to a system-wide search database. |                         |
| $\circ~{\rm Redesigned}$ chat file format and implemented backward compatibility for search.                                                                                             |                         |
| Lead Student Ambassador                                                                                                                                                                  | WA, USA                 |
| Microsoft Corporation                                                                                                                                                                    | Sept. 2003 to Apr. 2005 |
| $\circ~$ Promoted to Lead Student Ambassador in the Fall of 2004, supervised 10 - 15 Student Ambassadors.                                                                                |                         |
| $\circ$ Created and taught a computer science course, CSE 099: Software Design and Development.                                                                                          |                         |
| Head Teaching Assistant                                                                                                                                                                  | PA, USA                 |
| University of Pennsylvania                                                                                                                                                               | Oct. 2001 to May 2005   |
| $\circ~$ Implemented a user interface for the VS open file switcher (ctrl-tab) and extended it to tool windows.                                                                          |                         |
| $\circ~$ Created a service to provide gradient across VS and VS add-ins. Optimized service via caching.                                                                                  |                         |
| • Programmer Productivity Research Center (Summers 2001, 2002)                                                                                                                           |                         |
| • Built app to compute the similarity of all methods in a code base, reduced time from $\mathcal{O}(n^2)$ to $\mathcal{O}(n \log n)$ .                                                   |                         |
| $\circ~$ Created a test case generation tool that creates random XML docs from XML Schema.                                                                                               |                         |
| Software Design Engineer, Intern                                                                                                                                                         | WA, USA                 |
| Microsoft Corporation                                                                                                                                                                    | June 2003 to Aug. 2003  |
| $\circ$ Promoted to Lead Student Ambassador in the Fall of 2004, supervised 10 - 15 Student Ambassadors.                                                                                 |                         |

Sept. 2000 to May 2005

# Magneto-Thermal Thin Shell Approximation for 3D Finite Element Analysis of No-Insulation Coils

Albert Smith, John Doe, Jane Derry, Harry Tom, Frodo Baggins 10.1109/TASC.2023.3340648 🗹

## Projects

**Publications** 

## Multi-User Drawing Tool

- Developed an electronic classroom where multiple users can view and simultaneously draw on a "chalkboard" with each person's edits synchronized.
- $\circ$  Used C++ and MFC.

## Synchronized Calendar

- 2003 to 2004 • Developed a desktop calendar with globally shared and synchronized calendars, allowing users to schedule meetings with other users.
- Used C#.NET, SQL, and XML.

## **Operating System**

- Developed a UNIX-style OS with a scheduler, file system, text editor, and calculator.
- $\circ$  Used C.

## Additional Experience And Awards

Instructor (2003 - 2005): Taught two full-credit Computer Science courses.

Third Prize, Senior Design Projects: Awarded 3rd prize for a synchronized calendar project out of 100 projects.

## **Technologies**

Languages: C++, C, Java, Objective-C, C#.NET, SQL, JavaScript

Software: Visual Studio, Microsoft SQL Server, Eclipse, XCode, Interface Builder
