Welcome To Rendercy!

RenderCV Z is a LaTeX-based CV/resume framework. It allows you to create a high-quality CV or resume as a PDF file from a YAML file, with **full Markdown syntax support** and **complete control over the LaTeX code**.

The boilerplate content is taken from here \mathbb{Z} , where a *clean and tidy CV* pattern is proposed by Gayle Laakmann McDowell \mathbb{Z} .

Quick Guide

- Each section title is arbitrary, and each section contains a list of entries.
- There are 7 unique entry types: BulletEntry, TextEntry, EducationEntry, ExperienceEntry, NormalEntry, PublicationEntry, and OneLineEntry.
- Select a section title, pick an entry type, and start writing your section!
- Here **\(\mathbb{L}\)**, you can find a comprehensive user guide for RenderCV.
