Academic Projects

- Design and Construction of a Dynamometer**, [view on my website](#) Istanbul, Turkey
Fall 2022
- Designed and constructed a controllable dynamometer that measures an electric motor's torque and power output at different speeds for my senior design project.
- Design and Construction of an Automatic Guitar Tuner**, [view on my website](#) Istanbul, Turkey
Fall 2020
- Designed, built, and programmed a microcontroller-based device that tunes a guitar with DC motors as part of a mechatronics course term project.

Certificates

- Machine Learning by Stanford University**, [Certificate](#) Sept. 2022

Personal Projects

- Ray Tracing in C++**, [view on my website](#) Spring 2021
- Coded a ray tracer in C++ that can render scenes with multiple light sources, spheres, and planes with reflection and refraction properties.
